SUMMARY

Full stack web developer with strong analytical and communication skills. Dedicated to discovering, developing, and implementing creative solutions to complex web application challenges. Extensive experience in troubleshooting steps from current role as a ground radio maintainer in the Marine Corps Reserves.

SKILLS

Technical

Languages/Frameworks/Libraries/Databases: HTML, CSS, Javascript, Ruby. React, Ruby on Rails, PostgreSQL, Redux, Next.js

Testing: Jest, RSPEC

Testing/Version Control: Jest, RSPEC, Git

Other: Object-Oriented Programming (OOP), Test-Driven Development (TDD), Behavior-Driven Development (BDD), Pair Programming

Soft

Time management, Planning management skills, Conflict Resolution, Listening, Teamwork, Integrity, Problem Solving, Delegation, Self Confidence, Motivation

PROJECTS

TREASURE HUNT | JAVASCRIPT & REACT

- Randomizing a win-and-lose button, the user must click until they either run out of turns, find the treasure, or find the button that will enact a loss.

COLOR BOX | JAVASCRIPT & REACT

- Use a button to create a box with white as the default. When clicking on the box, it can change to another color. There is another button that can take away a box.

TEXT-BASED GAME | RUBY

- Used Ruby to build a text-based game on the terminal. The story will progress into different branches as the user inputs a series of yes or no answers.

WILDLIFE TRACKER | RUBY ON RAILS

- User is able to document animals that they see in the wild with different characteristics, where they were found, and what environment they were found in. The user is able to read the information, update the information, and delete information if they so chose.

PFT SCORE CALCULATOR | JAVASCRIPT

- As an MVP, I am recreating the USMC physical fitness test score calculator to understand how it functions so that I can refactor the application to incorporate React Native as an iPhone app.

CAT TINDER | JAVASCRIPT, REACT, RUBY ON RAILS

- The user is able to create, read, update, and delete cat profiles. Those profiles can be used in a similar functionality as Tinder where you can like or dislike a profile that is not your own.

APARTMENT APP | REACT ON RAILS

- After creating an account, the user is able to create, read, update, and delete apartment listings. The user is able to read a list of apartments and is able to see more details of an individual apartment listing.

EXPERIENCE

LEARN ACADEMY

San Diego, CA

Full Stack Web Development Student

2022 – 2023

- Completed 408+ hours of direct coding experience in an intensive web development boot camp
- Gained working proficiency in building JavaScript, Ruby, and React applications using Test Drive Development
- Utilized effective communication and cooperation through pair and mob programming projects with teammates

United States Marine Corps Reserve

San Diego, CA

Ground Radio Maintenance

April 2016 – Present

- Completed military education and applied concepts and theories of Algebra, Advanced Algebra, in troubleshooting and interpreting complex electronic circuits and radio equipment.
- Capable of working independently, efficiently, and effectively during high-tempo environments.
- Proficient at reading and interpreting maintenance manuals, service bulletins, and other specifications to determine the feasibility and method of repairing or replacing malfunctioning or damaged radio components.

Contribute-To-This-Project Repository

Remote

Maintainer

Mar 2022 – Present

- This repository on GitHub is a repository for users new to GitHub can make their first contribution
- Conduct code reviews, approve pull requests (PR), and resolve merge conflicts.

Sierra Vista High School

Baldwin Park, CA

High School Diploma

2009 – 2013
